

APEX STANDARDS

Pseudo Claim Charting (PCC)

IF you are

a licensor needing **more** claim charted SEPs before (F)RAND negotiations,
a pool licensor or an inventor needing to provide standard-claim mapping for earning **bonus**,
a licensee, buyer, defendant or IP counsel having to **timely investigate** patent validity,
a patent attorney wanting to run a **quick** shot **apriori** pitching and **win** a case, or
a portfolio manager constantly **deciding** what/where to file, sell, buy, assert or monetize...

PLUS, if you desire to reach **NEW HEIGHTS**

PCC renders **DIRECT INSIGHT** into IP Assets' selection process and allows to learn strengths and weaknesses of both your IP assets and competitors' IP assets.

PCC offers **SOLID EVIDENCE** to assess risk, therefore empowering you to make better, smarter **STRATEGIC** decisions.

Coverage

Multiple Industry Standards
3GPP TS, HEVC/AVC codec, IEEE, JEDEC Semiconductors
Validity Due Diligence before acquisition or litigation
Multilingual: English, Chinese, Japanese, Korean

Market Leader

Non-Disclosure Agreement: you are protected
NO Risk: free (\$0) sample for each patent for your evaluation
Quick Delivery: 48-hour turnaround upon order
Affordable: \$2,500-\$5,000 USD/charting based on complexity
